

# Weekly Disease Surveillance Report

## 2022 Reporting Week 04: January 23 — January 29

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

### Influenza (Flu) and COVID-19 Decreasing

COVID-19 and influenza-like illness (ILI) activity has decreased for the second week in a row; however, the COVID-19 community risk level remains HIGH and ILI is still elevated compared to previous flu seasons. As of February 1 in Okaloosa County, 18.8% of all hospital beds and 25.5% of ICU beds were occupied by COVID-19 patients. Of the hospitalized individuals, 53.2% are unvaccinated. Many medical facilities are reporting staffing shortages.

On December 27, the CDC [updated the COVID-19 isolation and quarantine recommendations](#) for the general population. Since that time, CDC has provided [background information](#) for reduction of isolation and quarantine timeframes and [further information on quarantine and isolation guidelines](#). [Guidance for managing healthcare personnel](#) with COVID-19 exposure or infection was also updated to enhance protection for staff, patients, and visitors.

### COVID-19 Booster Shots and Monoclonal Antibody Resources

The CDC has updated their guidance on COVID-19 [vaccinations](#) and, specifically, [booster](#) shots. Please continue to promote the COVID-19 vaccine as it is highly effective at preventing severe disease and death.

**PLEASE NOTE:** On [January 24, 2022](#), the U.S. Food and Drug Administration reissued the emergency use authorizations for Eli Lilly's bamlanivimab-etesevimab and Regeneron's REGEN-COV monoclonal antibody therapy treatments, which states that these treatments are not authorized for use in any U.S. state, territory, or jurisdiction at this time. Unfortunately, as a result of this abrupt decision made by the federal government, all state-supported monoclonal antibody therapy treatment sites will be closed until further notice. The full Florida Department of Health press release can be found [here](#).

## COVID-19 Snapshot

Week 04 Review		Difference from Wk03
Resident Case Count	2697	-504
Resident Case Count per 100K Population	1306.6	-244.1
Average Resident Cases per Day	385.3	-72
Percent Positivity	33.4%	-7.7

Data Source: Merlin Database

The Florida Department of Health (FDOH) provides the Centers for Disease Control and Prevention (CDC) with county COVID-19 data, including deaths.

Please visit the [COVID-19 Community Profile Report](#) webpage to obtain death data by downloading the most recent excel file and locating Okaloosa on the 'Counties' tab.

For questions related to COVID-19 death data, please contact the FDOH Office of Communications at 850-245-4111 or [NewsMedia@flhealth.gov](mailto:NewsMedia@flhealth.gov).

Week 04 Community Risk Level		
COVID-19 Community Risk Level	New Cases per 100K Population per Week	% Positivity per Week
<b>HIGH</b>	1306.6	33.4%
<b>PREVIOUS WEEK RISK LEVEL: HIGH</b>		
Low	<10	<5%
Moderate	10-49	5-7.9%
Substantial	50-99	8-9.9%
High	>100	>10%

Community risk level is the color of the higher risk level for the two indicators.

## VACCINATION DATA RESOURCE

The CDC COVID Data Tracker presents county level vaccination data that includes vaccinations from:

- FL SHOTS, including FL Department of Health, retail pharmacies, and long-term care facilities,
- Dialysis centers participating in the Federal Dialysis Center Program,
- Health Resources and Services Administration partner sites, and
- Federal entities such as Department of Defense, Veterans Health Administration, Indian Health Service and Bureau of Prisons.

Percentage of  
Breakthrough  
Infection in  
Fully-Vaccinated  
Individuals:

4.71%

# Influenza-Like Illness

Week 04: January 23 — January 29

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

**Figure 5:** Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa County for the 2018-19, 2019-20, 2020-21, and 2021-22 influenza seasons by week. Data source: ESSENCE

**ANALYSIS:** During Week 04, flu reporting partners and ESSENCE (a syndromic surveillance system) reported a decrease in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County decreased from 5.30% during Week 03 to 3.74% during Week 04. Flu partners reported no positive rapid influenza tests this week. Over the past three weeks, 24 out of 331 influenza specimens submitted to the state lab were positive (3 Influenza A H3, 19 Influenza A unspecified, 2 Influenza B unspecified). There were no ILI admissions, outbreaks, or deaths reported this week. The percentage of total ILI ED visits for Week 04 is higher than that of Week 04 last year.

*Note:* Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE

## % ILI by Age Group Week 04, 2022

Age Range	ILI Visits	Total ED Visits	% Total ILI Visits
0-4	19	138	13.77%
5-19	11	235	4.68%
20-34	14	408	3.43%
35-54	21	524	4.01%
55-74	10	526	1.90%
75+	4	281	1.42%

Data Source: ESSENCE

## % of Total ILI Visits by Facility Week 04, 2022

**Figure 6:** Hospital ED visits meeting ILI criteria stratified by facility. Percentages calculated based on total number of ILI ED visits. (n=79). Data source: ESSENCE

# Syndromic Surveillance

Week 04: January 23 — January 29

## Total ED Visits by Syndrome

**Figure 7:** Hospital Emergency Department (ED) visits from 2022 Week 04 by select syndrome category. Percentages calculated based on total number of ED visits (n=2112). Some syndrome categories are not represented; therefore, represented percentages will not total 100%.
